

When you let the grass of the pathways edge itself into your garden, not only are you reducing the size of your garden space, you are creating a lot of work for the future gardener that gets your lot. Maintaining your garden lot includes edging your garden each year to its full size. Each gardener is responsible for keeping the pathways mowed around their lot(s) for safety of walking and weed seed reduction. Failure to do so gets a reprimand.

This Garden Pathway is 78" wide

The strings are marking a 36" pathway
